

# & additional options

## Colour options

The foil laminated products used on major items in the roof and on the PVC side frames, have a real woodgrain texture to add a further dose of character. The products can be coloured one side or both, with the possibility to mix colours between the outside and the inside. Can't see the colour you want? Ask for a bespoke colour and we'll paint the conservatory in our factory!

Here is a selection of our standard 'foiled' colours

**Grey**  
Paint matching:  
RAL7016

**Ebony Black**  
Paint matching:  
RAL8022

**Irish Oak**  
Paint matching:  
RAL1011

**White**  
Paint matching:  
RAL9003

**Cream**  
Paint matching:  
RAL9001

**Sage Green**  
Paint matching:  
BS14C35

**Fir Green**  
Paint matching:  
RAL6009

Colour applied correctly has a profound positive effect on your wellbeing. It strongly influences how we interact with each other and our surroundings... so do you stick to conventional conservatory colours and finishes or do you choose something different?

White

Light Oak

Rosewood / Mahogany

Standard fascia

Dome chambered top capping

## Ultraselect Option

Ultraselect is a decorative strip that adds classical elegance. The strips simply click into place where the roof joins the side frames enabling you to change the design if you wish.

## Highly Insulated

The Ultraframe Roof - which we exclusively use - is the most insulated glazed roof that it is possible to buy. For example: The bars that run between the panels in the roof of your conservatory are covered with protective top cappings and through the use of chambered technology aid the thermal efficiency of the roof.

## Crestings & finials

Ball Finial,  
Low Profile Cresting

Crestings and finials are the decorative fittings that run along the top of your conservatory roof. There are crestings and finials to suit all tastes.

Not all crestings and finials are exchangeable / compatible with each other. In certain situations - e.g. colours - not all options are available.

Classic Finial,  
Classic Cresting

Classic Finial,  
Baroque Cresting

Sceptre Finial,  
Elizabethan Cresting

Coronet Finial,  
Tudor Cresting

Pikestaff Finial,  
Renaissance Cresting+

Low Profile Ridge /  
Cresting

## Tie bars

A tie bar is sometimes specified to help support the weight of a large roof or one that is fitted with glass. The position of the tie bar is dictated by engineering principles, and so they must be fitted. See p10 for a large picture of a roof featuring a tie bar. Ultraframe, however has developed a range of structural components to remove the necessity of tie bars in many projects. Please speak to your supplier to find out more about this option.
